FOOD PERFORM®

Improve cash flow, prevent loss of revenue and deliver superior service every time

Food Perform® is a comprehensive next generation mobile supply chain product for delivery and collection in the foodservice industry. Reliably connecting drivers on the road via mobile handheld devices to operations staff and computer-based information systems in the back office, Food Perform® helps you efficiently transfer time-sensitive and perishable products more cost-effectively, improving productivity, increasing cash flow and shortening invoice cycles.

Easy-to-deploy and easy-to-use, Food Perform® has a wide-ranging feature set that makes it ideal for the sophisticated logistics requirements in wholesale and retail foodservice distribution markets.

“Technology creates value, increased financial performance and operational practices deploying advanced mobile technology - increase customer satisfaction and allows time spent solving problems to be redirected to growing business.”

The International Foodservice Distributors Association (IFDA)

Food Perform® is the Industry-leading mobile supply chain product for foodservice distribution

Food Distribution Customers

FOOD PERFORM[®]

› Key Features

- Quickly create a clean invoice for every delivery, in real-time.
- Integrated Barcode scanning provides the location of all products and assets at all times, and assists in pre and post route reconciliation.
- Provide indisputable proof-of-delivery by capturing signatures at the time of delivery or service.
- All driver activities automatically receive timestamps for billing and payroll, including non-service activities such as breaks, meals and fuelling.
- Send automated email updates to reduce customer queries and improve satisfaction.
- View all service exceptions and unscheduled activities by distribution center, route or driver to quickly identify problems.
- Measure performance metrics such as mileage, scan and data capture rates, to conduct comparisons of planned vs. actuals. Utilize reports to document operational compliance, view proof of service and payment details.
- Customize the services a driver may add en-route.
- Require servicing of all items on manifest before completing stop
- Capture GS1 barcodes for vital traceability information such as item or lot numbers
- Provide additional safeguards around the modification of catch weights to insure accuracy and reduce errors

› Measurable Benefits

- Easily manage over, short & damaged items at each stop, without calling the office to report variances.
- Easily trace payments, credits and re-bills for complete accountability.
- Swiftly process payments at any delivery point, improving invoice cycles and reducing days sales outstanding.
- Greatly reduce inventory shrinkage — and your costs — by barcode scanning at load, delivery, and at check-in.
- Instantly get up-to-the-minute delivery status. Send new or updated jobs to a driver, wherever they are, within seconds — dispatch.
- Reducing errors, and insuring conformance to business processes

Aircllc recommends unlimited data plans. Carriers will work with customers directly to ensure an appropriate data plans is activated prior to service.
