ORDER PERFORM[®]

Accurate orders, delivered on time, mistake free and at the lowest possible operating cost

Order Perform[®] is a comprehensive mobile supply chain product designed for distribution. By providing the critical insight into the “last mile” of the supply chain, from warehouse to customer location, Order Perform[®] ensures orders arrive on time, mistake free and at the lowest possible operating cost.

Order Perform[®] replaces paper manifests with digital manifests on driver handheld devices, shrinking paper-handling costs and reducing drivers’ time in buildings. With a vast amount of critical delivery information at the driver’s fingertips, drivers are more productive on the road and customers receive the correct orders on time. Powerful and incredibly easy-to-use, Order Perform[®] enables drivers to complete critical tasks electronically, including the ability to process exceptions and returns even capture auditable compliance and proof-of-delivery documentation — with easy integration into back-office systems.

Best of all, equipping drivers with Order Perform[®] means back-office managers have the real-time visibility needed to track and manage their entire delivery operations — so managers and executives can make the strategic decisions necessary to improve business performance.

Paperless delivery saves up to \$9 per truck, per day.
